

Stuart Reilly

SOFTWARE DEVELOPER

07792 348919 | stu@reilly-family.co.uk | themadprofessor | stuart-r-364a1198

Summary

A self-motivated, caring individual who applies himself in a professional, efficient manner to all tasks. Arch Linux enthusiast, who loves to customize and tweak his installation, revelling in the chance to fix the system upon breakage. Enjoys learning new tools and technologies, providing new, cleaner and simpler solutions through their use.

Work Experience

Intrallect

Edinburgh & Glasgow, UK

SOFTWARE DEVELOPER

Aug 2020 - Present

- Work within a small team to produce a revolutionary new student hiring platform.
- Extended personal skill set through becoming a full-stack developer as requirements changed rapidly within a small team.
- Orchestrate and aid in multiple major version changes of multiple underlying core frameworks.
- Migrate platform to utilise industry-standard security protocols and platforms, including a custom authentication provider using proprietary voice biometrics.
- Replace a proprietary ChatBot tool with an open-source framework for AI engineering, which allowed the use of world-leading Large Language Models.
- Enforce strict automated quality control to ensure minimal tech-debt within the code and maintain a high level of code quality.
- Contribute fixes and improvements to open-source tools and libraries used within the platform.

AT&T

Edinburgh, UK

SOFTWARE DEVELOPMENT INTERN

Jun 2019 - Aug 2019

- Joined a team building a new network operating system for routers as part of AT&T's high speed network.
- Replaced an existing proprietary library with an open source alternative.
- Integrated the new library into the existing build system and CI pipeline.
- Extended a feature of the platform to allow for arbitrary implementations of an interface.
- Introduced a new command line interface to allow for the selection of implementations for the interface.

Cupris

London, UK

SOFTWARE DEVELOPMENT INTERN

Jul 2016 - Sept 2016

- Contributed to a pre-existing codebase, following predefined style and programming practices, such as Agile Programming.
- Introduced a new workflow to the platform by implementing a new administrative interface.
- Created a specification document, defining the new workflow, API endpoints and security considerations.
- Made use of Vaadin, Spring Boot, Spring Data and Spring Security.

Parc Computer Centre / COR Solutions

Hitchin, UK

JUNIOR TECHNICIAN

Sep 2015 - Jul 2016

- Undertook a wide array of computer repair tasks for customers of varying complexity.
- Direct communication with customers about their issues, repair status and payment.
- Carried out routine maintenance of internal and customer computer systems.
- Utilised a range of operating systems and tools to carry out repairs.

Education

University of Glasgow

Glasgow

COMPUTING SCIENCE BSc (HONS) 2:1

Sep. 2016 - Jul. 2020

- Dissertation project was to implement the IETF TAPS API in the Rust programming language.
- Elective courses include Functional Programming, Network Systems, Advanced Systems Programming and Safety Critical Systems.
- Participated in a team project to create a system to record, monitor and graph an organisation's staff performance.

Skills

Programming

Java, Rust, C, Groovy, Python, Bash, Javascript, Typescript, LaTeX

Web

HTML5, CSS3, Javascript, Typescript, Spring Web, Angular, React, Actix Web, Bootstrap, NodeJS, Django

Framework

Spring, Spock, Angular, Tokio, Actix, Vaadin, JavaFX, Java Swing

Security

Spring Security, Auth0, OAuth2, Passport.js

Tools

Git, IntelliJ IDEs, VIM, Make, Docker, Jenkins, GitLab Pipeline

Database Management

MySQL/MariaDB, MongoDB, PostgreSQL

Operating System

Windows, Mac OS X, Linux/Unix

Pause Gaming LAN Society

University of Glasgow

PRESIDENT 2018 - 2020 & CORE MEMBER

Sep. 2016 - Present

- Pushed the society to update the aging networking infrastructure.
- Interacted with multiple other societies to provide interesting society mixer events.
- Communicated with the Student Representative Council to ensure the society's longevity and continued use of the University's space.
- Changed the committee's priorities to encourage new members, rather than exclusively targeting pre-existing members.

GUMAF

University of Glasgow

SOCIAL SECRETARY 2019 - 2020

Sep. 2019 - Present

- Organised a variety of events to encourage a typically introverted demographic to socialise.
- Communicated with the Queen Margaret Union to make use of their space for events.
- Organised cross-society events to encourage more people to join the society.
